

TRU-TURF
ROLLING PERFECTION

RC50

Golf Greens Roller

WE'RE CHANGING THE GOLFING LANDSCAPE. AGAIN.

Driven by a flexible, full width contour following drive roller and equipped with Tru-Turf's **patented triple offset smoothing rollers**, following contours is a breeze.

While other greens rolling machines rely on weight to heavily compress the playing surface, Tru-Turf lightweight rollers deliver **smoothness and trueness** without compacting the soil beneath, resulting in **healthier greens**.

LED Lights can be added as an optional attachment. **Optional quick release attachments include Slicer, Spiker and Brush** to increase the productivity of the roller.

**Designed in Australia.
Manufactured in USA.**
