

INTRODUCING THE SR72 SPORTS AND FAIRWAY ROLLER

THE GAME CHANGER

IMPROVE TURF HEALTH AND REDUCE INJURIES

Superior playability, improved turf health, reduced disease and a reduction in sports injuries. The SR72 is a must have for sporting grounds.

Designed to true golf and sports turf surfaces through intelligent design – not by weight.

The SR72 is a versatile and productive attachment. This roller is easily towed by any tractor over 45 hp with front wheel weights and uses the three-point linkage system to raise, lower and operate.

Tru-Turf's patented triple offset smoothing head roller configuration delivers impressive rolling capabilities. A spiker that can be engaged allows you to perform two vital operations simultaneously – at a speed only limited by the local conditions.

Spiking results in healthier turf, as it improves oxygenation and moisture ingress, and it also helps break surface hardness, for an ever truer surface.

The outcomes are highly desirable: superior playability, a reduction in sports injuries, health, less disease and improved turf health.

The official choice of greenskeepers on the PGA TOUR, the Champions Tour and Nationwide Tour events throughout the USA and Canada.

Golf & Sports Turf Rollers

IMPROVE TURF HEALTH AND REDUCE INJURIES.

Superior Results From A Patented System

The roller has a 72" rolling width, featuring Tru-Turf's triple offset roller configuration.

Standardised Coupling

The 3PL system (category 2 or 3) is used to raise, lower and transport the roller.

Optional Weight Adjustment

Optional bar weights can be added to the SR72, according to the turf condition and your rolling or truing requirements.

Rapid Results

The SR72 roller can operate at high speed, and is restricted only by local conditions.

SR72 Specifications

Linkage	Use a 3pt linkage tractor. Min. 45hp with out front weights to suit
Engine - Horsepower	Minimum 45hp tractor required to tow
Smoothing Rollers	3 x 4" (101mm) steel rollers installed in our patented triple offset configuration
Spikers	1/4" (6.35 mm) spring steel, set 40mm (1 1/2") apart
Spiker Depth	1" (25mm), 1 1/2" (38mm) or 2 1/4" (55mm)

Speed	Low or High
Ground pressure	Low
Rolling Width (Swath)	72" (1830mm)
Weight - Operating	1650lb (750kg)
Options	Additional Weights
Warranty	2 years - Limited manufacturers warranty
